*NH Environmental Educators
Annual Conference*

Wednesday, March 12, 2008

*McLane Center
at Silk Farm, Concord*

*Changing the Face
of Science Education*

*Teachers and Non-formal Educators Working Together
to Improve Science Literacy in New Hampshire*

In 2006, the New Hampshire Department of Education approved the NH Frameworks for Science Literacy. Assessment of students' science knowledge will begin in May 2008 through the NECAP (New England Common Assessment Program) Science Assessment.

How are the Frameworks changing science instruction in NH schools? How can classroom teachers and non-formal educators work together to meet the science literacy frameworks? Answers to these questions and more will be addressed at the 2008 New Hampshire Environmental Educators Annual Conference. Attendees will explore the NH Frameworks for Science Literacy and hear success stories from classroom teachers and non-formal educators working to meet the Frameworks and improve science literacy in NH.
